Hi Greg,

I will have better thoughts on the formaldehyde peer review toward the latter part of this month. My goal is to move forward, but if not, we have a range of other needs we can discuss.

And yes, I will make the email introductions to Office of Land and Emergency Response (OLEM) in the morning.

Tina

**Subject:** Followup on our October 24 meeting

Tina,

Hope you've had a good week. After a few conversations here, I wanted to follow up on a couple of items.

-- Greg Symmes will contact David Dunlap to request a meeting, probably with Greg, Elizabeth Eide, and me participating.

-- Can you clarify your thoughts about repurposing the funds that were devoted to the formaldehyde study? It wasn't clear to me in retrospect if you were talking about trying to give us new tasks under the existing task order contract, presumably with a time extension to later in 2019, or if you planned to try to roll those funds into the new contract. Please let us know how you would like to proceed, and what if anything you need from us at this point.

-- Ray and I would like to take you up on your offer to connect us with Steve Cook and Barry Breen at OLEM, to discuss Ray's idea to explore toxicant clean-up levels at contaminated sites, and other topics that Steve and Barry might be interested in. Would you be able provide us with an email introduction, with the aim of a meeting of Steve and Barry for Ray and me?

Thanks again for last week's conversation, and have a good weekend,

Cliff
